

Aftercare Advice - Makeup Application

Please take a moment to read the aftercare advice below; this is important because you need to know how to maintain the finished result, how to re-apply certain products and how to achieve this look yourself. You also need to know how to remove the makeup at the end of the day or when the occasion is over.

Be aware of any allergic reactions – in which case, remove with a damp absorbent cotton cloth, and apply a soothing lotion such as calamine lotion.

- Avoid swimming, heat treatment such as steam, sauna or hot tubs or hot environments.
- Avoid UV treatments.
- Avoid touching the face.
- Remember to remove your makeup at the end of the day. Use oil-based eye makeup remover for stubborn eye makeup and waterproof mascara.
- Try to cleanse, tone and moisturize your face twice a day using products suitable for your skin type.
- Exfoliate one to three times a week to brighten the complexion.
- Apply an appropriate mask after exfoliating to clear the skin and bring natural radiance.
- Give your skin a day of 'rest' so it can return to its normal pH and prevent the chance of a break-out and stress of the skin.

The following tips will help to prolong the wear of your makeup application throughout the day, and to look after the skin.

- We advise that you have matching face powder, eyeshadow and lipstick to touch up during the day.
- Avoid touching the face.
- Use a spray fixative or setting powder to make the products on your face last longer.
- Use blotting sheets/paper that soak up excess oil on the skin without ruining your makeup.
- To re-apply lipstick, do this with a lip brush and blot, apply lip gloss.

We strongly recommend you consider booking a makeup lesson, this will help you select colors that are right for you, trendy and teach you the basics of everyday makeup application.

If redness or irritation occurs, remove the makeup and apply a cold compress or cooling spray to the area to reduce the heat. Seek a physician's assistance if it doesn't improve in 24 hours.
